Native

### PROJECTS

---

**Style Decor**, <https://styledecorpro.netlify.app>  12/2025  
Built a full-stack decoration booking platform using React, Node.js, MongoDB, and Stripe with secure online payments. Developed role-based dashboards for admin, users, and decorators with JWT-based authentication. Implemented real-time booking status tracking, smart scheduling, and decorator assignment to streamline operations. Focused on responsive UI, clean architecture, and scalable backend design.

**E-shop-by-Next-JS**, <https://e-shop-by-next-js.vercel.app> 12/2025  
NextItems is a high-end, modern e-commerce landing page crafted with Next.js 14, Tailwind CSS, and Lucide Icons. Designed for tech gadgets and electronics stores, it prioritizes lightning-fast performance and a vibrant, energetic interface that captivates users.

**TastyHaaat-Team-Project**, <https://tasty-haat.netlify.app>  11/2025  
Developed a full stack team project for a food delivery platform using React, Vite, Tailwind CSS, and DaisyUI. Built a mobile-first, responsive UI with a sticky navbar, hero section, and clean layout structure. Collaborated closely with team members to integrate frontend sections and dashboards while maintaining code quality and consistency. Focused on performance, reusable components, and smooth user experience.
